

AI-Powered Document

Automatically ingest, extract, classify, and route documents at scale. Reduce manual work, cut errors, and get full visibility on processing status.

 Get Started

Smart Ingestion

Automatically process PDFs, Word docs, images, and emails with intelligent prioritization.

AI Extraction

Advanced OCR and NLP to extract text, entities, dates, and key information.

Auto Classification

Machine learning models identify document types with high confidence scores.

Smart Routing

Automatically route documents to appropriate systems with fallback handling.

4-Stage Processing Pipeline

Watch your documents flow through our intelligent processing system

1. Ingested

File received and metadata extracted

2. Extracted

Text and entities extracted using AI

3. Classified

Document type identified with confidence

4. Routed

Delivered to target systems

Ready to Transform Your Document Workflow?

Join thousands of enterprises using DocFlow AI to process millions of documents automatically.
