

Document Classification

Automatically classify documents using advanced machine learning models. Our AI analyzes content, structure, and context to determine document types with high confidence scores.

AI Classification Features

State-of-the-art machine learning for document type identification

Multi-Model AI

Combines multiple AI models for accurate document classification

Confidence Scoring

Provides confidence percentages for classification accuracy

Real-time Processing

Fast classification with immediate results and feedback

Custom Categories

Supports custom document types and industry-specific categories

Available Documents for Classification

Documents that have completed text extraction and are ready for AI classification

No documents ready for classification. Complete text extraction first.

Document Types Distribution

Classification results across all processed documents
